GOLDSTAR MINERALS INC.

Notes to Condensed Consolidated Interim Financial Statements
Nine months ended September 30, 2017 and 2016
(Unaudited)

1. Reporting entity and going concern:

Goldstar Minerals Inc. (the "Company" or "Goldstar") is a company domiciled in Canada and was continued under the Canada Business Corporations Act on September 4, 2014. The address of the Company's registered office is 400 Henri-Bourassa East, Suite 200, Montréal, Québec.

The Company is involved in the exploration of mineral properties in the Province of Québec and the Province of New Brunswick. Although the Company has taken steps to verify title to mineral properties in which it has an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes the Company will continue its operations in the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the ordinary course of business.

The Company is in the process of exploring and evaluating its mineral properties and projects and has not yet determined whether its properties and projects contain ore reserves that are economically recoverable. The Company is still in the exploration stage and, as such, no revenue has yet been generated from its operating activities. As at September 30, 2017, the condensed consolidated interim statements of financial position shows a negative working capital of \$23,936. The ability of the Company to meet its commitments as they become due, including the acquisition of mineral properties and the development of projects, is dependent on its ability to obtain necessary financing. The recoverability of amounts shown for mining properties and exploration and evaluation assets is dependent upon the ability of the Company to obtain necessary financing to complete the exploration and development thereof, and upon future profitable production or proceeds from the disposal of properties. If the Company is unable to obtain sufficient additional funding, this could lead to a delay, reduction or elimination of its exploration plans, which could adversely affect the business, its financial condition and its results.

Management believes that it will be able to secure financing in the future. However, as at September 30, 2017, since the Company has a negative working capital, the Company does not have sufficient financial resources to cover its budgeted general administrative expenses and to meet its short-term obligations for the next twelve months, and to complete its planned 2017 calendar year exploration budget. Consequently, the Company will need to obtain additional financing in 2017. While the Company has been successful in securing financing, raising additional funds is dependent on a number of factors outside the Company's control, and as such there is no assurance that it will be able to do so in the future.

The conditions mentioned above indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. The condensed consolidated interim financial statements do not reflect the adjustments to the carrying amounts of assets and liabilities that would be necessary if the Company were unable to realize its assets or discharge its obligations in anything other than the ordinary course of operations.

8. Share capital and warrants (continued):

The number of share purchase warrants outstanding fluctuated as follows during the period:

Expected life	-	2 years

As at September 30, 2017, the following share purchase warrants were outstanding:

9. Share option plan:

In September 2016, the Company adopted a new stock option plan (the "new plan"). This plan replaces and supersedes the Company's previous plan. The new plan is to be administered by the Directors of the Company. Under the new plan, the Company may grant to directors, officers, employees and service providers, options to purchase shares of the Company.

Options granted under the new plan will be for a term not exceeding five years. The new plan provides that it is solely within the discretion of the Board to determine who should receive share options, in what amounts, and determine vesting terms.

Under the new plan, the Company shall reserve for issuance under the plan a maximum number of 4,037,708 shares of its capital stock. All shares subject to options that have terminated without having been exercised shall be available for any subsequent options under the Plan.

The fair value of options is estimated at the date of the grant using the Black-Scholes option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability exercise restrictions (including the probability of meeting market conditions attached to the option).

On September 27, 2016, the Company granted 4,037,708 share options to directors, officers, and service providers, exercisable at \$0.10 per share. These options vested at the date of the grant and will expire after a period of five years. At the date of the grant, the weighted average fair value of options granted was \$0.05 per option for a total value of \$201,885.

The following weighted average assumptions were used in these calculations:

	September 30, 2017	December 31, 2016
Risk-free interest rate	-	0.59%
Expected life	-	5 years
Expected volatility	-	199.427%
