Notes to Condensed Interim Financial Statements
Nine months ended September 30, 2020 and 2019
(Unaudited)
(in Canadian dollars)

1. Reporting entity and going concern:

Goldstar Minerals Inc. (the "Company" or "Goldstar") is a company domiciled in Canada and was continued under the Canada Business Corporations Act on September 4, 2014. The address of the Company's registered office is 2075 Robert-Bourassa, Suite 600, Montréal, Québec.

The Company is involved in the exploration of mineral properties in the Provinces of Québec and New Brunswick. Although the Company has taken steps to verify title to mineral properties in which it has an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

These condensed interim financial statements have been prepared on a going concern basis, which assumes the Company will continue its operations in the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the ordinary course of business.

The Company is in the process of exploring and evaluating its mineral properties and projects and has not yet determined whether its properties and projects contain ore reserves that are economically recoverable. The Company is still in the exploration stage and, as such, no revenue has yet been generated from its operating activities. The ability of the Company to meet its commitments as they become due, including the acquisition of mineral properties and the development of projects, is dependent on its ability to obtain necessary financing. The recoverability of amounts shown for mining properties and exploration and evaluation assets is dependent upon the ability of the Company to obtain necessary financing to complete the exploration and development thereof, and upon future profitable production or proceeds from the disposal of properties. If the Company is unable to obtain sufficient additional funding, this could lead to a delay, reduction or elimination of its exploration plans, which could adversely affect its business, its financial condition and its results.

Management expects that the working capital available to the Company at the end of the period will not provide the Company with adequate funding to cover its budgeted general administrative expenses and to meet its short-term obligations for the next twelve months, and to complete a 2021 calendar year exploration budget. Consequently, the Company will need to obtain additional financing in 2021. Management believes that it will be able to secure financing in the future. While the Company has been successful in securing financing, raising additional funds is dependent on a number of factors outside the Company's control, and as such there is no assurance that it will be able to do so in the future.
